MAKING SENSE OF INVESTING

ment portfolio. Over time, these windfalls can add up.

- Reduce your debts. It may be easier said than done, but try to reduce, or eliminate, as many debts as you can. The less money you have to pay each month on your debts, the more you'll have available to save and invest. Of course, some debts, such as your mortgage, can't be easily erased, but if you can find ways to cut down on spending, you may be surprised at how much progress you can make toward debt reduction.

- Prepare for the unexpected. Life is unpredictable – and some unforeseen events could threaten your ability to achieve, and maintain, your financial independence. For example, if you were unable to work for a while due to illness or injury, you might be forced to dip into your savings and long-term investments just to help meet your cost of living. You can help protect yourself from this risk by building an emergency fund containing several months' worth of living expenses, with the money kept in a liquid, low-risk account. And you may want to consult with a financial professional to learn about other protection strategies.

It will take a concerted effort to reach your financial independence – but, like all freedoms, it offers immense benefits.
